

9th June 2021

Dear Parents and Carers,

Young STEM Leader Programme Celebration Event

During this year, your young person has been involved with the Young STEM Leadership Programme (YSLP). They have been talking about how STEM (Science, Technology, Engineering and Maths) is part of their everyday lives and the different careers that use STEM.

They have been completing Discover, Create, Lead and Inspire aspects of the YSLP. They have been discovering about STEM. They have created and planned an activity. They have been leaders for their chosen activity. And they have thought about how important inspiration is and how to use it during their activity.

To celebrate all their achievements, hard work and to meet other students in West Lothian that have also taken part in the YSLP, we are joining an online celebration event from 2-3pm on Thursday 17th June. During this online event, there will be several guests including some of the Young STEM Leader team.

Yours faithfully,

Belinda Cook
STEM Development Post Holder
Science Teacher

Award 2010
